📍 Clermont, FL  
in francoiscoding  
🔗 FrancoisCoding

A software development and performance engineering expert with 2+ years of experience in developing quality assured applications and supervising/training students. A collaborative developer and engineer with experience and education in the hardware and software sides of technology who thrives on discovery and accelerating performance.

## Skills

### PROGRAMMING TECHNOLOGIES

JavaScript  
Python  
C#  
ReactJS  
Express  
Git  
SQL  
Redux  
SASS  
MongoDB  
Cypress Testing

### PROFESSIONAL SKILLS

Technical  
Troubleshooting and  
Debugging  
Software and Engineering  
Documentation  
Systems Architecture and  
Operations  
Teamwork and Cross-  
functional  
Communication  
Performance Engineering

## Projects

### CoachMe Health - <https://app.coachmehealth.org/register>

Patient first non-profit organization dedicated to improving the health of low-income Americans with diabetes and heart disease with health coaching for those who need it most.  
ReactJS | Redux | SASS | Twilio | Cron Jobs | ChartJS | Cypress

- Collaborated remotely with a team of 7 Web Developers and 2 UX/UI Designers to build a fully functional web application over the course of 8 weeks.
- Utilized Twilio's API alongside Cron Jobs to schedule messages to be sent to clients on the backend (Node.js) in order to communicate with users efficiently.

### React Movies - <https://reactmovies-rmdb.netlify.com/>

An IMDB style real world Web Application in ReactJS. This application was built individually by me and serves to provide up to date movie information/details.  
ReactJS | Bootstrap

- Solely responsible for creating the entirety of the application which includes a platform where users can view information of over 10,000 of the latest movies released.
- Utilized The Movie Database API in order to display all information about latest movie titles to users.

### Francois Games - <https://francois-game-center.netlify.com/>

A gaming platform where users can view up to date information on the latest video games. This application was built individually by me and serves to provide up to date game information/details.  
ReactJS | Bootstrap | Material UI | Styled-Components

- Solely responsible for creating the entirety of the application which includes a platform where users can view over 300,000 game titles.
- Utilized the RAWG Video Games Database API in order to display all information about latest video game titles to users.

## Employment

### Lambda School

Team Lead

<https://lambdaschool.com/>  
Nov. 2019 to Current

- Mentored 10+ students on how to learn effectively and solve programming problems.
- Provided daily feedback and issue resolution of all curriculum through Slack interface.
- Led daily standup meetings to build camaraderie, facilitate sharing of ideas and work progress, and provide guidance for that week's study material.
- Delivered one-on-one feedback and code review on a weekly basis, giving feedback on areas of improvement.

### CoachMe Health

Full Stack Engineer

<https://www.coachmehealth.org/>  
Oct. 2019 to Dec. 2019

- Developed and maintained system design documents (e.g. proofs of concept, requirements specification, subsystems) and collaborated with project managers to scope milestones, resource use, and report to clients on project progress.
- Collaborated cross-functionally with clients and hardware engineers during the development and integration project phases to troubleshoot and/or debug software stacks.
- Converted requirements from clients into production ready APIs that enabled customization and streamlined work progress.
- Interfaced with development engineers to develop test cases, diagnose problems, and develop debugging methodologies.

## Education

Full Stack Web Development, Lambda School · May 2019 to Feb. 2020  
Remote
